Cumulative Author Index to Volumes One through Six of *Journal of Direct Marketing*

Listings are arranged alphabetically by author and alphabetically by article. Principal or sole authors appear in boldface type. If a name appears in both bold and regular type, it means that the author has appeared as both a principal and a secondary author on different articles. References are first to volume number, then to issue number of the periodical in which the article appears. Note: "Principal" author refers to the first name on a paper's title page and has been retained for convenience in indexing, even in cases where the authors have indicated equal participation in the article.
